

Intro - to-app (like a loading screen)

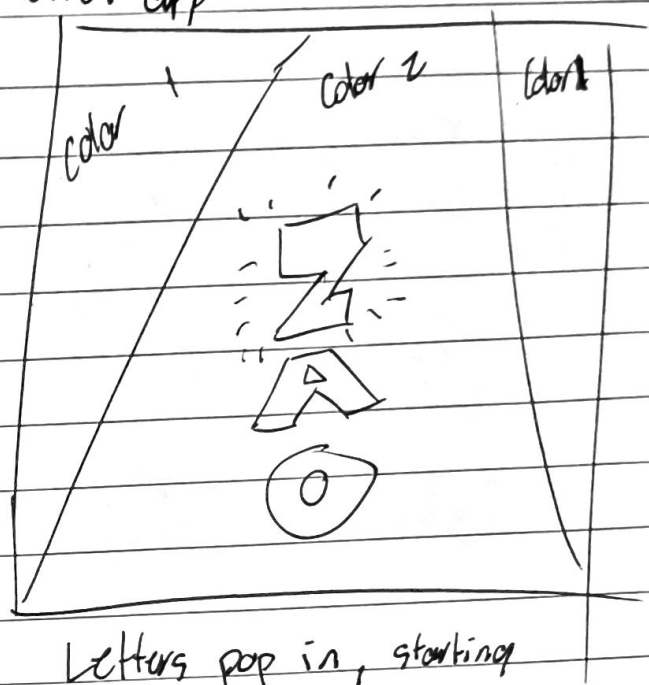

64 actual app

* can be used as loading icon as well.

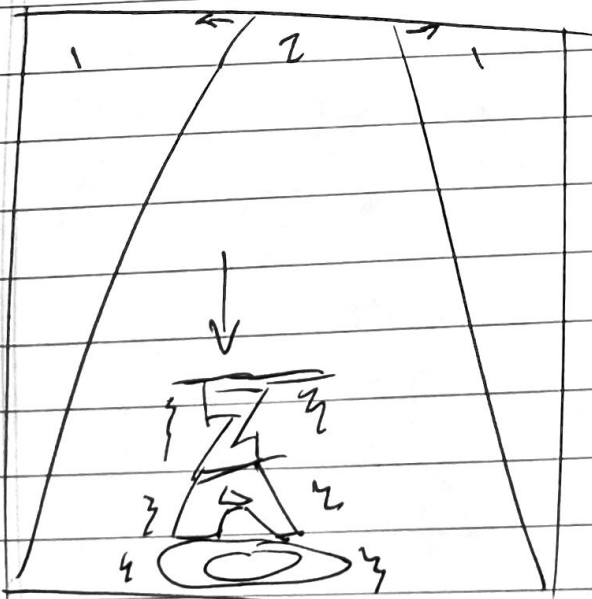

ALSO:
other names work as well

empty space / starting of the loading screen

Letters pop in, starting @ Z, a, @.

Letters squeeze together, like spring. (Top opens slightly, just enough room for Zao)
can be taken out

Letters zoom out, returning screen back to square one

Main W/O Tabs

Pretend it's not cracked

Side 1:
Swipe 1
to pull
up side
w side of
tab, swipe
again to
pull up
payment
tab

Side 2:
Same
as side
1, but
for
income

Current daily budget:

#

Goals:

- o Grab a car # / # + \$1000
- o Pay off College Debt # / #
COMPLETE!
- o Something else # / #

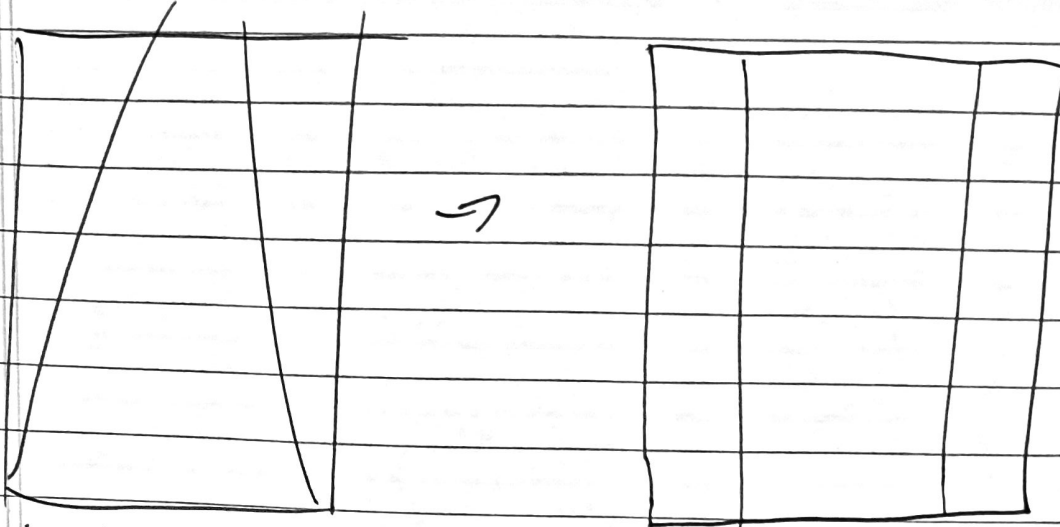

Number of Days Under Budget

#

etc. as scroll below

Transition to Main page / Main layout

Loading screen
in empty state

Bars widened out,
presenting the content

* bars
can be
tabs, or
fade out
completely

Main w tabs

* Icons correspond
to type of
input.

ex:

 = update
payment

 = update
income

Pros: all info is
on screen

Cons: VERY
cramped

Tab 1

Current daily spending
allowance:
OF \$

Tab 2

Total Savings:

~~~~~

Goals:

~~~~~ ~ / ~

~~~~~ ~ / ~

Frequent Spending:

~~~~~ : ~ !

Friend goals:

Tapping

* ~~Swiping~~ L/R
takes user
to appropriate
spot *

* Swiping down
